GitHub LinkedIn Portfolio

PROFILE

Product-focused Flutter and Android Developer delivering production-ready mobile, Windows desktop and web applications end to end. Experienced in application architecture, reusable UI, role-based workflows, Firebase, REST, PHP/MySQL integrations, debugging, testing and release delivery.

PROFESSIONAL EXPERIENCE

Flutter Developer, DiziSpark Technologies Aug 2025 - Feb 2026 | Rejoined Sep 2026 - Present

Remote

- Rejoined in Sep 2026 to own end-to-end delivery of RentMeter, a connected Owner, User and Admin ecosystem across Android, Windows desktop and web.
- Previously delivered client-focused Flutter applications with responsive UI, reusable role-based workflows, Firebase and REST integrations, validation, debugging and release-ready delivery.

App Developer / Flutter Developer, TechCanOpus Professus LLP Mar 2026 - Aug 2026

Rohini, Delhi

- Delivered Sahubyte User and Vendor applications covering hardware/software repair requests, vendor acceptance, on-site service completion and required-parts listing using Flutter, Provider/GetX, Firebase and REST APIs.
- Shipped feature modules for Selorize, a separate Cashify-like phone resale application, including responsive screens, API integrations, validation, reusable components and production bug fixes.

Android Developer Intern, Brainybeam Info-Tech Pvt. Ltd. May 2025 - Jul 2025

Ahmedabad, Gujarat

- Implemented Android UI and feature updates, resolved defects and supported testing through Git-based version control and issue tracking.

SELECTED PROJECTS

RentMeter - Property and Rent Management Ecosystem Play Store

- Built connected Owner, User and Admin applications with role-based access, property and tenant workflows, rent tracking, receipts, reminders, reports, subscriptions and shared backend services.
- Delivered responsive Flutter experiences for Android, Windows desktop and web while keeping reusable components, Firebase services and product behavior consistent across platforms.

Selorize - Phone Resale Platform Play Store

- Shipped at TechCanOpus as a Cashify-like resale experience with Flutter user flows, reusable UI, REST API integration, validation and production bug fixes.

Suraksha Setu - Coaching Institute Full-Stack App GitHub

- Developed Flutter mobile and web interfaces with PHP/MySQL backend workflows, REST API data flow, authentication, validation and separate role-based screens for students, instructors and admins.

VedPath - Spiritual and Scriptures App GitHub

- Built Ramayan, Mahabharat and Bhagavad Gita content, quizzes, naam jap modules, temples, saints, festivals and daily Firebase-backed content.
